

Context IS

Context is a leading cyber security consultancy with a comprehensive portfolio of advisory and advanced technical services, from cyber strategy and risk assessments, penetration testing and assurance to incident management and response, training and technical security research. We focus on helping clients avoid potential breaches and to deter, detect and respond to the most sophisticated cyber-attacks. Established in 1998, Context's client base includes some of the world's leading blue chip companies, alongside public sector and government organisations. With offices in the UK, Australia, Germany and USA, Context is ideally placed to work with clients worldwide.
