

## Seric Systems and Arcserve

### Seric

Seric, a Trusted Partner of SBRC, have security baked into our DNA, whether we are designing complete IT platforms, refreshing existing infrastructure or embedding frameworks, we ensure that all aspects are secure, compliant and fit for purpose. The Seric DNA is a combination of a strong moral compass, focus on the desired client outcome, and security 'built-in'. We push ourselves on every engagement, on every decision, to ensure that security, resiliency, effectiveness and 'doing the right thing' brings the desired outcome to the benefit of our clients.

### Arcserve

Starting with the release of our first backup solution in 1988 and fueled by a series of pioneering solutions, we leverage our heritage to develop transformative technologies that solve for any data protection need. Our team is made up of customer enthusiasts, skilled architects of simplicity, and expert engineers who have seen it all. We're committed to going beyond data protection alone - we take a whole-business approach to protecting the time, money, and productivity of our customers by removing the complexity of backing up and restoring critical business data. Today, our award-winning solutions are used by organizations in more than 150 countries around the world.
