i-confidential

Based in Edinburgh, **i-confidential** is an employee-owned company that provides trusted leadership on information security for some of the UK's largest and best-known firms.

Understand, Fix, Manage – these are the pillars of our approach. We help clients improve their existing position and take the right steps to effectively control security.

Our proprietary Control Framework defines and prioritises the controls to secure businesses against the latest threats. It underpins our i-Deliver product suite, which incorporates security assessments, strategy and investment planning, security metrics, access recertification, and third-party evaluations.

We also offer highly skilled security practitioners for output-based remediation programmes and operational activities.

Focusing on people, process, and technology, i-confidential delivers practical solutions to protect information.
